## INSTRUCTIONS

1. Print onto 80gsm paper; heavy stock is difficult to fold.

2. Cut carefully along the dotted line, or use a cutting knife if you have one handy.

3. Lay the chatterbox flat with the design facing down. Fold in half, to make a rectangle. Unfold. Repeat with the other side to make a "+" through the centre.

4. With the design still facing down, take each corner and fold into the centre to make a smaller square. This should reveal the floral design.

5. Turn the smaller square over and fold each corner into the middle again. This should reveal the numbers.

6. Fold the chatterbox in half so the numbers are facing, then insert thumbs and pointer fingers under the floral design while lifting into the chatterbox shape.
